SUMMARY

Born in 2001, I am a senior student in computer engineering who wants to advance in the field of web programming. I started learning HTML, CSS and JavaScript 3 years ago. And when I saw the possibilities that JavaScript offered I was truly amazed and this increased my desire to learn. With couple of small projects like calculator, drum kit and simon says game increased my design and coding skills you can check them out on my github.I was introduced to React in the 3rd grade and I am currently trying to develop full stack projects on my own. Although I do not have any formal work experience, I believe that I have improved myself with my projects in the past 2 years and I will continue to develop with passion and be open to learning.

EDUCATION

Nisantasi Univercity

Computer Engineering
2020 - still studying

Kadikoy Kultur Highschool

2016-2020

SKILLS

- HTML, CSS, JS
- Reactjs, RTK, Redux
- Graphql, MongoDB
- Tailwind, Mongoose, Express,Nodejs,
- Collaborator
  Passionate

LANGUAGES

English
B2 level

HOBBİES

- Designing
  Gaming

WORK AND PROJECT EXPERIENCE

FULL STACK DEVELOPER

Threads Clone

Nisantasi Univercity 1 Jan - 24 Jan Istanbul
Github link here

It's a MERN stack threads clone project that I developed and presented as a school project. I used React along with Vite for the frontend. For the design, I used Chakra UI, a CSS library. For the backend, I used Mongoose Express and NodeJS. I tried to develop it step by step by commiting.

FULL STACK DEVELOPER

Twitter Clone

Dec 13 2023 - Jan 2 2024
Github link here

It's a MERN stack twitter clone project that I developed for practicing and learning backend.I used React along with Vite for the frontend. For the design, I used tailwind CSS library. For the backend, I used Mongoose Express and NodeJS.

FRONTEND DEVELOPER

React Quiz App

Its a quiz game project for practicing and understanding concept of reducers
Github link here

FULL STACK DEVELOPER

Graphql Expense Tracker

Project that you can track your expences like investment, saving and expenses.
Github link here
